

# Nasuni AWS migration services

Assisted and full migration options for AWS customers

## Overview

Designed for new and existing customers, Nasuni Cloud Migration Services assists organizations with moving massive amounts of files from their existing NAS and other file server infrastructures to be centrally managed by Nasuni and AWS. Delivered remotely and staffed by Cloud Solution Architects, Nasuni Cloud Migration Services helps you properly prepare, plan, execute, and operationalize your file infrastructure. This ensures a successful transition from your legacy file system to your new cloud infrastructure on Nasuni and AWS.

### How are Nasuni cloud migration services delivered?

Various tools may be used to expedite the file migration and ingestion process depending on the customer's environment, bandwidth, configuration, and goals, including:

- Robocopy or Rsync for built-in migration utilities.
- Free 3rd party migration utilities such as Rclone and FastCopy.
- Low-cost, high value tools such as Beyond Compare and GuruSquad.
- Customers may also elect to choose a premium migration tool for various reasons. These other tools offer capabilities that include permission changes, change of custody, and comprehensive reporting. These tool include Datadobi, Atempo, Reslio, and Komprise.

## Is Nasuni cloud migration right for you?

Nasuni Cloud Migration Services is well-suited for customers that don't have in-house expertise in file sharing best practices, cloud deployments, or cloud technology. Nasuni Cloud Migration Services is available as an Assisted or Full Migration Service to help customers with various needs and budgets. Assisted Migration is for customers who want structured, technical guidance as they migrate their file workloads, but who have the skills to perform the work themselves. Full Migration is for customers who want a Nasuni Certified Professional to perform the migration tasks and be fully responsible for the entire migration. Both the Assisted and Full Nasuni Cloud Migration Services options are designed for customers who need to quickly remove current file sharing and management pains and show a quick win with their cloud investment strategy.

## What's included

Every Nasuni Cloud Migration Services customer (Assisted or Full) will receive:

- Initial survey of environmental and operational implementation requirements
- Data migration planning and workload analysis
- Data migration project plan and schedule
- Regularly scheduled touchpoints
- Status reporting
- Production launch readiness validation per use case
- To ensure successful service delivery and get you deployed as quickly as possible, we rely on your team to complete all prerequisites prior to service inception. The service is based on weekday work only and the services are delivered in English.
