

# Migrating your File Infrastructure to the Cloud?

## Top 3 Questions Answered by Nasuni

### Before

**Q** "How much cloud experience does my team need?"

**A** **No cloud skills required!** We build out your team's cloud skills with cloud fundamentals training as part of our larger Architecture & Planning Workshop. At every step of the way, our collaborative approach ensures everyone involved learns the skills they need. By the time you cut over to Nasuni, your whole team will be cloud file storage experts!

"With Nasuni, it was quite smooth"

### During

**Q** "How long will it take to migrate?"

**A** **We are really, really good at moving petabytes of file data really fast!**

Nasuni's three-step process makes sure you receive the fastest time-to-value out of your cloud migration. We include valuable tactics to squeeze the most out of your internet pipe, like compressing and 'chunking' data to move your files to the cloud as quickly and efficiently as possible.

"Migration from our NAS environment to Nasuni was simple."

### After

**Q** "How much time and effort will be needed to manage Nasuni after we cut over?"

**A** **On average, our customers tell us they spend 60% LESS time managing their file infrastructure.** You'll be consolidating a lot of technology and admin consoles (like file servers, backup software, sync tools, disaster redundancy, and more) to one simplified Nasuni Management Console.

Once up and running, Nasuni practically runs itself. And if you ever have questions, our [award-winning customer support](#) is ready to take your call.

"Nasuni has put a great deal of effort into simplifying and streamlining the migration process."

"My plan is to get rid of all on-premises files servers and **migrate everything into Nasuni!**"

Dave Coffman, Director of Enterprise Infrastructure, Meredith
