# Nasuni Administrator Training

Gain marketable credentials and expertise in Nasuni and cloud technology.

## Overview

Nasuni's in depth administrator training program is focused on producing highly knowledgeable, technically proficient Nasuni experts within your IT organization.

Education on Nasuni technology, architecture, and integrations as well as help with project planning empower you to deploy Nasuni in multiple sites and support large numbers of users with your own IT resources, while adhering to best practices as you scale.

## Is Nasuni Training Right for You?

Nasuni Training is designed for senior IT professionals and enterprise architects who are tasked with ensuring a successful Nasuni implementation. Customers who complete Nasuni Training benefit from accelerated deployments and greater utilization of Nasuni enterprise file services.

Use Nasuni Training to teach new IT hires, IT professionals absorbed through acquisitions, and new IT departments how to manage Nasuni across multiple business units and locations so that the full business benefits and cost-saving advantages of a global file system are realized.

The service is also well-suited for IT professionals who want to gain marketable credentials in cloud technology, and distinguish themselves as experts in file infrastructure modernization and digital transformation projects.

## How is Training Delivered?

Nasuni Training is a fixed priced service typically delivered on-site over 2 or 3 days. The program can be tailored for IT organizations charged with carrying out cloud-first initiatives or given corporate mandates to embrace the cloud for strategic purposes. A Nasuni training professional will work with you to customize the curriculum to meet your specific requirements.

*"To support our global client base, we have offices all over the world. We leveraged Nasuni training to develop expertise in each location. Think of it as Nasuni University – an intensive crash course on how to make the most of your global file system. We had hands-on lab exercises, programs in which we had to configure live data flows, and more. Our admins said their only wish was we'd started the training earlier."*

## About Nasuni

Nasuni enables organizations to store, protect, synchronize and collaborate on files across all locations at scale. Nasuni Cloud File Services™, powered by the Nasuni UniFS® global file system, leverages cloud storage to modernize primary NAS and file server storage; archiving; backup; and disaster recovery, while offering transformational new capabilities for multi-site file sharing. By combining the low cost, unlimited capacity, and durability of object storage from leading cloud vendors such as Amazon, Azure, Dell EMC, and IBM, with the high performance, security, and broad application compatibility of traditional file storage, the Nasuni subscription service improves workforce productivity, simplifies IT operations, and reduces IT costs. The world's largest companies in 12 industry sectors rely on Nasuni to maximize the business value of their file data and ensure business continuity.
