

## Managing Web Access

You can access CIFS share data or NFS export data stored in the Nasuni Filer using a Web browser. Some of the actions you can perform depend on the capabilities of the Web browser.

### Using NFS? Do this first:

For details on the use of multiple protocols, see [Using Multiple Protocols](#).

*On Nasuni Filer:* **Volumes** → select NFS volume → **Properties** → **Volume Protocols**  
→ select **CIFS**

*On NMC:* **Volumes** → **Protocols** → click **Edit** for NFS volume → select **CIFS**

### Enabling Web Access for a share:

*On Nasuni Filer:* **Status** → **CIFS Status** → click share name  
→ **Show Advanced Options** → select **Web Access**

*Note: Web Access is not available with LDAP Directory Services security.*

*On NMC:* **Volumes** → **Shares** → click **Edit** for share → select **Web Access**

*Note: Web Access is not available with LDAP Directory Services security.*

### Web Access branding:

*On Nasuni Filer:* **Configuration** → **Web Access Branding** → select logo and colors.

*On NMC:* **Filers** → **Web Access Branding** → select Nasuni Filers → **Edit**  
→ select logo and colors.

# Using Web Access

Task	Action
<b>Open</b> a share or folder.	Click the <i>name</i> of that share or folder. The contents appears as a list.
<b>Sort</b> the display.	Click <b>Sort</b>  . Select <b>Type</b> , <b>Name</b> , <b>Size</b> , or <b>Modified</b> .
<b>Upload</b> a file to folder.	Click <b>Upload files</b>  . Navigate to files OR drag and drop files.
<b>Download</b> a file, several files, or a folder.	Click single item, or Ctrl-click multiple items to select. Click <b>Download</b> . Your browser downloads items. Multiple files go to a .zip file. Maximum files: 2,000.
<b>Create</b> folder.	Click <b>Add Folder</b>  . Enter name for new folder.
<b>Create</b> internal links to files or folders.	Select file or folder. Click <b>Get internal link</b>  . Copy text of internal link URL for use elsewhere.
<b>Create</b> external links to files or folders.	Select item. Click <b>Share public link</b>  . In <b>Share Public Link</b> dialog box, click <b>On</b> . Select expiration date and type of access. If password required, enter password. Click <b>Create</b> . Copy text of link URL for use elsewhere.
<b>Open</b> a file.	Click the <i>file name</i> . If the browser handles the format, the file opens.
<b>View details</b> about a folder or file.	Click <b>View Details</b>  . If the item is a folder, the name of the folder and date last modified appear. If the item is a file, the name of the file, date last modified, and the size appear. To view previous versions of file, click <b>Click to View</b> .
See other <b>versions</b> of a file.	Click <b>View Details</b>  . Click <b>Click to View</b> .
<b>Delete</b> a file or an empty folder.	Select item, then click <b>Delete</b>  . In dialog box, click <b>Delete</b> .
<b>Show</b> hidden files.	Click <b>Settings</b>  . In dialog box, select <b>Yes</b> , then click <b>Save</b> .
<b>Go to</b> Nasuni Filer Admin interface.	Click <b>Logout</b> , then select <b>Filer Admin Access</b> .
<b>Logout</b> .	Click <b>Logout</b> .
